Updated May, 2026

EMPLOYMENT

Department of Mathematics, UCLA

Assistant Professor (tenure track)

Los Angeles, CA

2025/7–present

DataX, UCLA

Affiliated Faculty

Los Angeles, CA

2025/7–present

Courant Institute, New York University

Assistant Professor/Courant Instructor (non-tenure track)

New York, NY

2023/9–2025/7

EDUCATION

California Institute of Technology

Ph.D. in Applied and Computational Mathematics

Advisors: Thomas Y. Hou, Houman Owhadi, Andrew M. Stuart

Pasadena, California

2018–2023

Tsinghua University

B.S. in Pure and Applied Mathematics

Beijing, China

2014–2018

RESEARCH INTERESTS

My research lies at the intersection of applied and computational mathematics, applied probability, and statistics. I am interested in the mathematical analysis and applications of probabilistic inference, stochastic algorithms, and PDEs in scientific computing and data science. My recent focus is on high dimensional sampling and generative modeling.

PUBLICATIONS

Preprints

GRANTS

- DataX Pilot Projects Grant Program, UCLA DataX 2026
- Research Allowance Program, UCLA Council on Research Faculty Grants 2026
- AMS-Simons Travel Grant, American Mathematical Society and Simons Foundation 2025–2027

AWARDS

- The W.P. Carey and Co. Prize in Applied Mathematics, 2023, Caltech 2023
- Kortschak Scholars Program, Department of Computational and Mathematical Sciences, Caltech 2018–2023
- Tsinghua Xuetang Mathematics Program, Department of Mathematical Sciences, Tsinghua University 2015–2018
- Outstanding Undergraduate, Tsinghua University and Beijing 2018
- Baosteel Scholarship, Baosteel Corporation 2017
- Scholarship in Memory of the “12.9” Student Movement, Tsinghua University 2016
- Qualcomm Scholarship, Qualcomm Corporation 2016
- Scholarship in Memory of Mathematics Professor Ou Li, Tsinghua University 2016
- National Scholarship, Ministry of Education of China 2015

TEACHING

Instructor at UCLA

- MATH 164: Optimization Winter 2026
- MATH 285J: Seminar in Applied Mathematics
(Topics in High-Dimensional Sampling and Generative Diffusions) Spring 2026

Instructor at NYU Courant

- MATH-UA 120: Discrete Mathematics Fall 2023
- MATH-UA 120: Discrete Mathematics Spring 2024
- MATH-UA 252: Numerical Analysis Fall 2024

- MATH-UA 252: Numerical Analysis

Spring 2025

Teaching Assistant at Caltech

- ACM 109: Mathematical Modeling
- ACM 118: Stochastic Processes and Regression
- ACM 117: Probability and Stochastic Processes
- ACM 109: Mathematical Modeling

Spring 2021

Winter 2020

Fall 2020

Spring 2020

INDUSTRIAL EXPERIENCES

Citadel Securities

Quantitative Research Intern

Miami, Florida

6/2022-8/2022

- Project on Alpha Research: Predicting APAC Market Returns

Microsoft

Part Time Researcher, working with Pengchuan Zhang

(virtual) Redmond, Washington

9/2021-2/2022

- Project: Stabilizing Large Scale Neural Network Training of Vision Transformers

REFEREE SERVICES

- **Journal:** Communications on Pure and Applied Mathematics, Annals of Applied Probability, Proceedings of the National Academy of Sciences (PNAS), Journal of Machine Learning Research, Mathematics of Computation, Journal of the Royal Statistical Society Series B, Journal of Computational Physics, Journal of Functional Analysis, SIAM on Uncertainty Quantification, SIAM on Imaging Sciences, SIAM on Optimization, SIAM on Mathematics of Data Science, SIAM on Multiscale Modeling and Simulation, SIAM on Numerical Analysis, SIAM on Control and Optimization, IMA Journal of Numerical Analysis, Analysis and Applications, Nature Machine Intelligence, Linear Algebra and Its Applications, European Journal of Applied Mathematics, Foundations of Data Science, Discrete and Continuous Dynamical Systems, Research in the Mathematical Sciences, Computational Methods in Applied Mathematics, Computers & Fluids, International Journal of Computer Mathematics
- **Conference:** NeurIPS (outstanding reviewer), International Conference on Geometric Science of Information (GSI)

CONFERENCES AND SEMINARS

- “Generative diffusion and sampling: algorithms and theory in high dimensions”, DataX+IDRE AI Symposium, UCLA, May 2026
- “Affine Invariant Samplers and Flows: Analysis and New Algorithms”, Monte Carlo online seminar, April 2026
- “Affine Invariant Samplers and Flows: Analysis and New Algorithms”, SIAM Conference on Uncertainty Quantification (UQ26), Minneapolis, Minnesota, March 2026
- “Variational Optimality of Föllmer Processes and related design questions in generative diffusions”, Generative modeling reading group seminar, Duke University (virtual), March 2026
- “Exploring High Dimensions in Dynamical Sampling: Flattening the Scaling Curve!”, Mathematics of Information, Data, and Signals Seminar, UCSD, San Diego, Feb 2026
- NeurIPS 2025, San Diego, Dec 2025
- “Exploring High Dimensions in Dynamical Sampling: Flattening the Scaling Curve!”, Applied Mathematics Seminar, University of California, Berkeley, Nov 2025
- “Exploring High Dimensions in Dynamical Sampling: Flattening the Scaling Curve!”, Applied Mathematics Colloquium, UCLA, Oct 2025
- “Exploring High Dimensions in Dynamical Sampling: Flattening the Scaling Curve!”, Scientific Computing and Numerics seminar, Cornell University (virtual), Oct 2025

- “Exploring High Dimensions in Dynamical Sampling: Flattening the Scaling Curve!”, Computational Math + X seminar, Caltech, Oct 2025
- “Exploring High Dimensions in Dynamical Sampling: Flattening the Scaling Curve!”, PDE & Applied Mathematics seminar, UC Riverside (virtual), Oct 2025
- “Exploring High Dimensions in Dynamical Sampling: Flattening the Scaling Curve!”, Computational and Applied Mathematics Colloquium, Penn State University, Sep 2025
- “Lipschitz Guided Dynamical Transport for generative flows of ill-conditioned distributions”, Workshop on Scientific Machine Learning: Theory, Algorithms, and Applications, Purdue University, Sep 2025
- “Convergence of Unadjusted Langevin in High Dimensions: Delocalization of Bias”, International Conference on Monte Carlo Methods and Applications, Illinois Institute of Technology, Chicago, July 2025
- “New Affine Invariant Ensemble Samplers and Their Dimensional Scaling”, Computational Bayesian Statistics Journal Club, Flatiron Institute, New York, May, 2025
- “Analysis and design of high dimensional sampling with applications in scientific computing ”, Purdue-PSU-Maryland joint mathematical data science seminar (virtual), April, 2025
- “Analysis and design of high dimensional sampling with applications in scientific computing ”, Applied Math Colloquium, UCLA, Los Angeles, Jan 2025
- “Convergence of Unadjusted Langevin in High Dimensions: Delocalization of Bias”, Probability Seminar, University of Michigan, Ann Arbor, Jan 2025
- “Analysis and design of high dimensional sampling with applications in scientific computing ”, Colloquium Seminar, University of Michigan, Ann Arbor, Jan 2025
- “Analysis and design of high dimensional sampling with applications in scientific computing ”, Applied Math Colloquium, Duke University, Durham, Jan 2025
- “Analysis and design of high dimensional sampling with applications in scientific computing ”, CMOR Special Lecture, Rice University, Houston, Dec 2024
- “Randomized and sparse Cholesky for learning with Gaussian processes”, SIAM Conference on Mathematics of Data Science (MDS24), Atlanta, Georgia, Oct 2024
- Recent Advances and Future Directions for Sampling, Yale University, New Haven, Oct 2024
- “On approximate, efficient sampling in high dimensional scientific computing”, Data Science Seminar, Department of Mathematics, University of Minnesota, Oct 2024

ORGANIZATION OF TECHNICAL SESSIONS, WORKSHOPS, AND CONFERENCES

- Organizer committee of UCLA Math Colloquium
- Organizer committee of UCLA Data Theory Seminar
- Co-organizing the minisymposium “Analysis of Langevin and related algorithms” in International Conference on Monte Carlo Methods and Applications, Illinois Institute of Technology, Chicago, July 2025
- Co-organizing the minisymposium “Efficient computation and learning with randomized sampling and pruning” at the SIAM Conference on Mathematics of Data Science (MDS24), Atlanta, Georgia, Oct 2024
- Co-organizing the minisymposium “Recent Advances in Kernel Methods for Computing and Learning” in SIAM Mathematics of Data Science, San Diego, September, 2022.

COMPUTER SKILLS

Professional experiences in Python, Julia, MATLAB.
